

## Basic Vim Commands

### VI Editor

Vi Editor is a widely used text editor in Unix/Linux systems and is known for its efficiency and flexibility.

#### 1. Create/Edit a file

To create/edit a file in the Vim editor run the below command

##### Syntax:

```
vim filename
```

##### Example:

```
vim new.txt
```

Replace **[filename]** with the name of the file you want to create or edit. In this case, the filename is **new.txt**

#### 2. Changing modes in the Vim editor

There are Six modes in Vim editor.

- **Editing/Insert Mode:** To make any changes in a file in Vim editor user has to first enter editing/insert mode, Press **'i' or 'a'** to enter editing/insert mode.

Entering in Insert Mode

- **Command Mode:** To run any command in Vim editor user has to enter command mode, if you are in editing/insert mode

Press **Esc** then ':' followed by the command. **For example:** set the number

### 3. Quit the Vim editor

To quit the Vim editor enter command mode and use the following command,

Command	Description
:q	Quit the editor
:q!	Quit without saving changes i.e. discard changes.
:wq	Save the changes and quit the editor

#### Example/Screenshot:

Quitting Vim Editor

### 4. Save the changes

To save the changes to the file in the Vim editor enter command mode and use the following command,

Command	Description
:w	Write to file called [file_name] (save as).
:w!	Overwrite to file called [file_name] (save as forcefully).
:wq	Save the changes and quit the editor

## 5. Navigation in Vim editor

We have covered the navigation in Vim editor in a detailed article at GFG which you can check [here](#).

Command	Description
k	Moves the cursor up one line.
j	Moves the cursor down one line.

h	Moves the cursor to the left one-character position.
l	Moves the cursor to the right one-character position.

## 6. Delete a line

To delete a single line Press the **Esc** key if you are in insert/editing mode, go to the file you want to delete Press '**dd**' and then the line gets deleted.

To delete a range of lines use the following command,

### Syntax:

```
:[start],[end]d
```

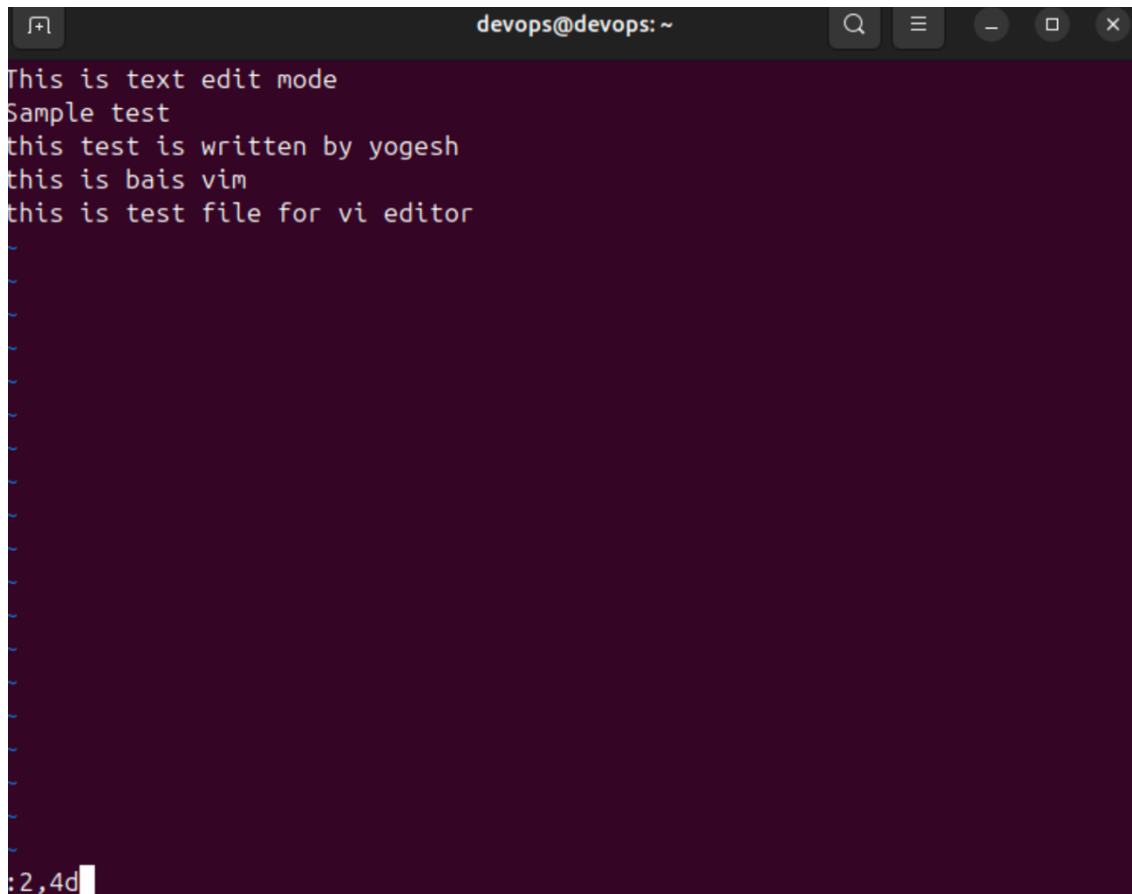

**Example::2,4d** In this command the editor will delete the lines from **3 to 5** including the extremes.

### Example Screenshot:

```

This is text edit mode
Sample test
this test is written by yogesh
this is bais vim
this is test file for vi editor

```

```
devops@devops: ~
This is text edit mode
Sample test
this test is written by yogesh
this is bais vim
this is test file for vi editor
:2,4d
```

Deleting a Line

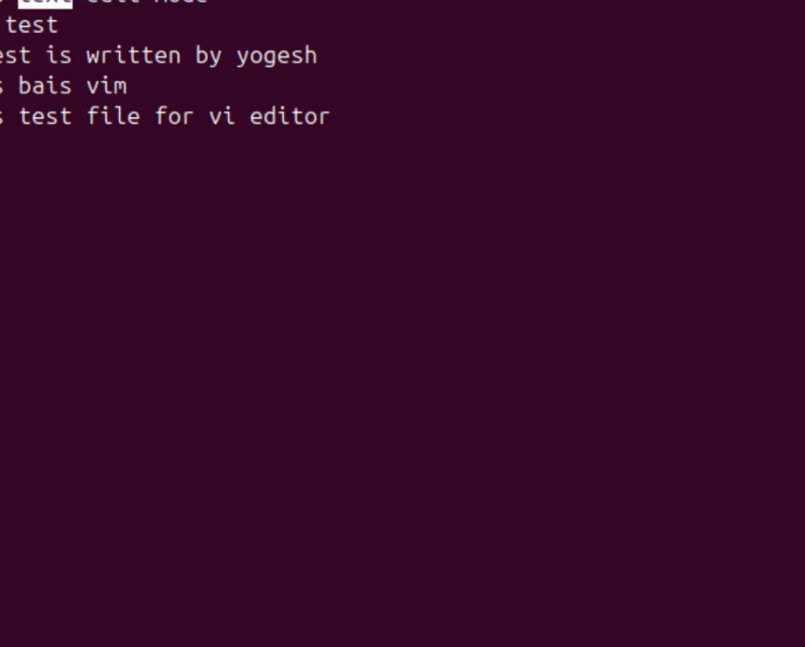

## 7. Search and Replace

To find and replace words in the vim editor we use **substitute** or **:s** command syntax of the command is as follows:

```
:[range]s/{pattern}/{string}/{flags} [count]
```

The command searches the pattern in [range] lines and replaces the **[pattern]** with **[string]**. If **[range]** is not mentioned then the command will replace the words in the current line with **[string]** only.

**Example:**

```
devops@devops: ~
This is text edit mode
Sample test
this test is written by yogesh
this is bais vim
this is test file for vi editor

:s/text/test
```

[illegible]

## 8. Display Line Numbers

To display **absolute line numbers** use any of the following commands,

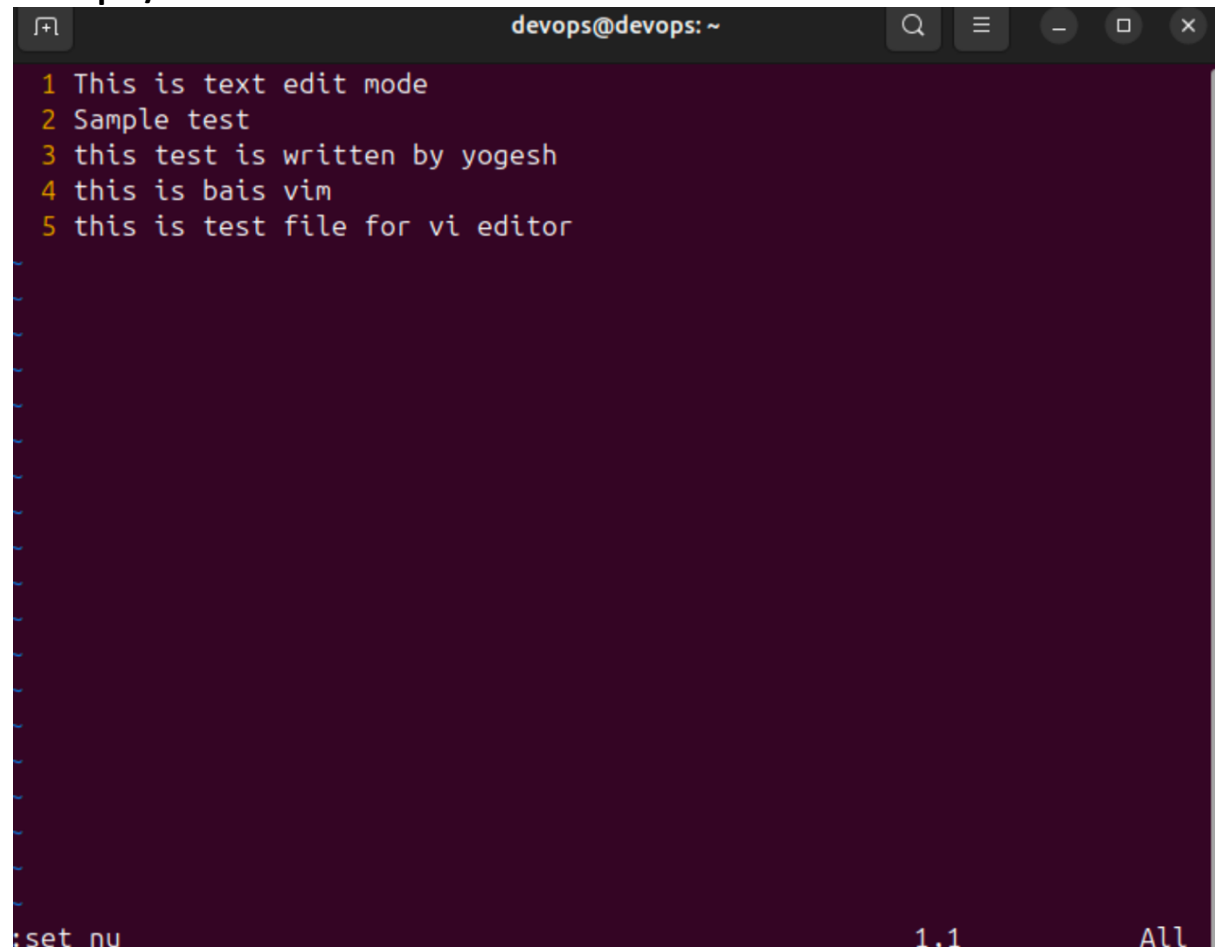

### Syntax:

```
:set number
```

or

```
:set nu
```

### Example/Screenshot:

The screenshot shows a terminal window with a dark purple background. The window title is "devops@devops: ~". The terminal content shows a text editor in command mode with five lines of text, each preceded by an absolute line number (1 through 5). The text is: "1 This is text edit mode", "2 Sample test", "3 this test is written by yogesh", "4 this is bais vim", and "5 this is test file for vi editor". At the bottom of the terminal, the command ":set nu" is entered, and the status bar shows "1,1" and "All".

To display **relative line numbers**: In relative line numbers the current line is shown as 0 and the lines above and below are incremented by 1,

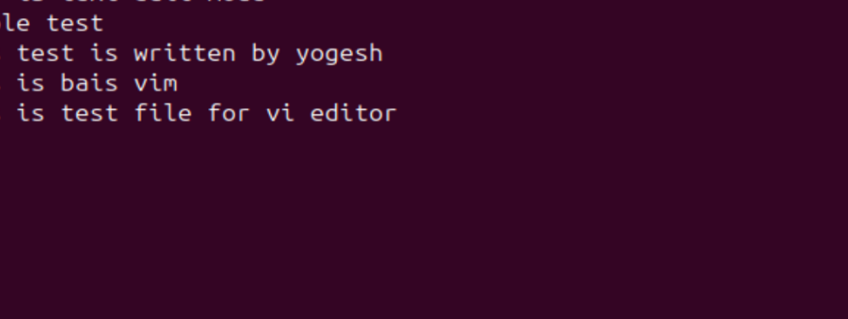

### Syntax:

```
:set relativenumber
```

or

```
:set rnu
```

### Example/Screenshot:

```
devops@devops: ~
3 This is text edit mode
2 Sample test
1 this test is written by yogesh
0 this is bais vim
1 this is test file for vi editor

:set rnu 4.1 All
```

## 9. Hide Line numbers

To hide absolute line numbers use any of the following commands,

### Syntax:

```
:set nonumber
```

or

```
:set nonu
```

### Syntax:

```
:set norelativenumber
```

Alternatively,

```
:set noru
```
